

## THE GATE CLOSER SPECIALISTS

### MAG2500 & MAG5000 Combined electromagnet & handle

With the Locinox MAG2500 & MAG5000 electromagnetic lock, everything is included to give your customer a durable and reliable electromagnetic lock with a stylish appearance to compliment their gate.

All MAG lock edges are rounded making MAG2500/5000 locks ideal for schools, narrow gate installations and most other gate applications.

Specify for access control applications where sharp edges projecting into the gate aperture are unacceptable, welding facilities are not available and appearance is important.

#### Accessories:

LOCINOX

#### Key features:

250 kg and 500 kg holding force options

Every MAG lock force tested at factory

Residual magnetism (remanence) ejection system

Can be wired 12V DC or 24V DC
